KNIGHTS IN CONTROL OF LAKE EXTENSION

Deal is Finally Completed for the Taking Over of Property in American Fork and Little Cottonwood,

Arrangements were completed today whereby the Knight interests secure control of the Mountain Lake Extension property, which is on the divide between Little Cottonwood and American Fork mining districts. At a recent meeting, the officers of the company were changed and the Knight interests were changed and the Knight interests were put in control. This means that "Uncle" Jesse Knight has added another big property in the district to his already large holdings.

Some time ago an option was given on 58,303 shares of the treasury stock. It is believed that with this stock, and the stock are already held was sufficient.

what the Knights already held was suf-ficient to give them control.

The officers who have been elected

are J. Will Knight, president; H. C. Edwards, vice president; R. E. Allen, sceretary and treasurer. The officirs with B. H. Thomas and L. A. Christink compose the directorate.

The company is capitalized at \$100,009 with shores at 10 cents each. When

with shares at 10 cents each. When the company was incorporated 700,00 shares were placed in the treasury. At the present time something over 350,000 shares are outstanding. The price at which the control changed hands is not given.

which the control changed hands is not given.

The property consists of 19 claims and is equipped with a boardinghouse, blacksmith shop, snow sheds, cars, rails and tools. A tunnel is being sent in to catch the six veins that are said to traverse the Mountain Lake, Mountain Lake Extension and Mineral Flat properties. The tunnel is now in a distance of over \$50 feet. A 200 foot shaft has also been sunk and something over \$60 feet of winzes have been sunk. Of the total number of claims 14 are patented and five have been surveyed. At present five men are working on the property.

Louis A. Christink, who was one of the promotors of the property and who is at present a director in the new company will undoubtedly remain as the superintendent of the company.

In spite of the improved conditions on the Iron Blossom property and the posting of an 8-cent dividend, stock this morning started to sag. At the opening of the session 2,100 shares of stock crossed the rail at \$1,72½ and from that it continued on down, until the close, when it was selling weak at \$1.67½. This is somewhat of a difference from \$3.37½, the high record reached in February shortly after one was encountered. What is the real reason for the decline is hard to tell. Some of the wise ones believe that stories have been circulated in regard to the property to allow a certain few to get a good chunk of gold. The physical condition of the property is said to be of the best.

of the best.
Sloux Consolidated was sold at a new high mark this morning, when it crossed the rail for \$1.17\(\frac{1}{2}\). Columbus Consolidated continues to go lower and reached a new low level this morning

of \$1.87/2.
Profit taking after the little flurry in Utah Consolidated sent the stock down to 16½ cents this morning. to 1542 cents this morning.
The number of shares of stock sold on
the Sait Lake exchange this morning
was \$41,050, while the amount represented was \$35,256.75, which is a slight improvement over the market of yesterday.

On the Utah exchange the number of shares sold was 7,575, while the amount was \$2,815.75.

On the curb market this morning Thompson was offered at 21 cents and a

bid of 14 cents was made for Naildry-er. Ploche King sold for 35 cents and was offered at 37 cents.

MANHATTAN PLACERS DISTRIBUTED WEALTH

Capt. Mayne Tells of Visit to Gold Diggings-Place is Handicapped by Slow Arirval of Machinery.

Capt. A. H. Mayne, with H. W. Clark and John T. Hodson recently visited the much-talked-of Manhattan placers and the mines a Round Mountain, where Mr. Clark is manager of the Sphinx property. The delay in getting machinery to the placer property is said to be the cause of the district being held back. In speaking of the district Capt.

Mayne said:

"When I was there, two weeks ago, about 60 holes were going down, but at this time I should say there were at least 75 getting down to debrock as fast as they can be put down. Twelve or 15 have already begun drifting on the bed, but the majority of them are handicapped by the long delay in getting machinery to their ground. That there is gold there, and lots of it, can not possibly be denied, and that one of the days the people will be compelled to realize that Nevada does not necessarily have to depend upon he quartz mines for her output or her greatness.

I believe that within a radius of 50 miles of Manhattan there are a number of gulches where placers will be found. Beck Tunnel, 1,000 at 45.

This placering at Manhattan does not applearing at Manhattan does not applear the strike of the gold. placering at Manhattan does not appear in spots, but it would appear that the Creator has evenly distributed it all along this guich, since there uted it all along this gulch, since there is not a barren stretch in the district so far as it has been developed. Many believed at first that the finds of phenomenally rich gold had simply been shaken down from the surrounding ledges, and that it would appear only in places. From Manhattan the party went to Round Mountain, where Mr. Clark iti-spected the Sphinx property, which has been shut down for about three weeks on account of litigation over water rights upon which the Sphinx was dependent, but in which the company was not involved. BELIEVE IN HEINZE STOCKS.

The repeated efforts of interests unfavorable to F. Augustus Heinze to bear the market for his stocks has caused considerable discussion in the east as to the real merits of the trou-ble. In speaking of the affair the Bos-ton Financial News says:

ton Financial News says:

"There has been very heavy selling of Davis-Daly and Ohio Copper this week on the developments in the personal affairs of F. A. Heinze and the fear that they would lead to liquidation of its holdings. This does not seem probable, however, as the stocks, are held mainly in the treasury of the United Copper company. At any rate both these properties are exceedingly both these properties are exceedingly promising and whatever may happen to Mr. Heinze personally will not detract from the values found in the mines. Davis-Daly has opened good ore bodies and is preparing to ship while the Ohio is getting its plant ready for shipments as rapidly as possible, so that with the prices for these issues as low as they are it would seem to be a mistake to throw them over."

CHICAGO.

Chicago, June II.—The near approach of harvest in Missouri and Kangas nerved the bears in the wheat pit to a fresh raid on the July delivery at the opening of the market today which resulted in wide fluctuations in the price of that option. Initial quotations on July were at 1.164 to 1.174 which were 4.64 higher to 5.64 lower than yesterday's closing flures. The market was also advorsely affected by hearish foreign advices. Weather conditions in this country were more favorable. Free covering by shorts resulted in a considerable rally, the price for a time holding steady around 1.17.

The corn market was quite weak at the start owing to profit-taking in the July delivery. Receipts were a trifle larger than expected and weather conditions were greatly improved. The opening on July was unchanged to ½ lower at 72½ to 73. Later the price deelined to 21½ 6 %.

72½ to 73. Later the price declined to 72½ € ½.

Oats were weak on selling by cash interests. July opened ½ € ¼ lower at 52½ and sold off to 53.

Provisions were easy at the start because of a 5 to 10c. decline in live hogs, but the market railied a trifle owing to moderate investment demand. Prices at the opening were 2½ to 5 lower.

Wheat—After a fair raily due to a 3c. advance at Winnipeg the market again became weak owing to renewed

the price of that delivery declined to 1.15½. The close was fairly steady, with July ½ lower, at 1.18% 6½. Corn—The market was nervous the remainder of the day and was easy at the close, with July off % 6¼ at 72% 6%.
